

Monitoring and evaluation discussion in relation to the EU macro-regional strategies

10 November 2022 | Plitvička, Croatia

Ilze Ciganska, Interact

WHY macro-regional strategies?

- MRS arise from a need to find more targeted solutions to common complex societal challenges.
- MRS inspire and provide orientation for more effective cooperation across regions.
- MRS aim to make macro-region, and thus the whole of Europe stronger, more resilient and attractive to live in, everywhere and for all.

In other words -

MRS aim for policy change and greater impact in Europe

HOW MRS deliver on what they promise?

Cross-sectoral collaboration

Co-design and implementation of actions

Multi-level governance stakeholder participation

Alignment of resources

(legislation, institutions, funding, human)

Long-term change/impact

(policy & implementation)

declarations etc.

WHAT MRS do to deliver on defined objectives

There are many ways to achieve the intention set in the Action Plans:

- What impact/change do you wish and can make?
- How can you take advantage of MRS framework (added values)?
- What do you need to do?
- How do your activities on the ground lead to the desired impact? How do you measure this?

uns:				
INPUTS Which resources do we need?	IMPLEMENTATION How do we generate these services, processes, and products?	OUTPUTS What services, processes, and products do we need?	OUTCOMES What do we need to change?	IMPACT What effects do we want to achieve?
			Desirable change – what would be done differently and who	Often already set in the Action Plan, ministerial

From the EUSALP Learning Environment final report, PANVAL

would do what

differently?

MRS pull together resources for change

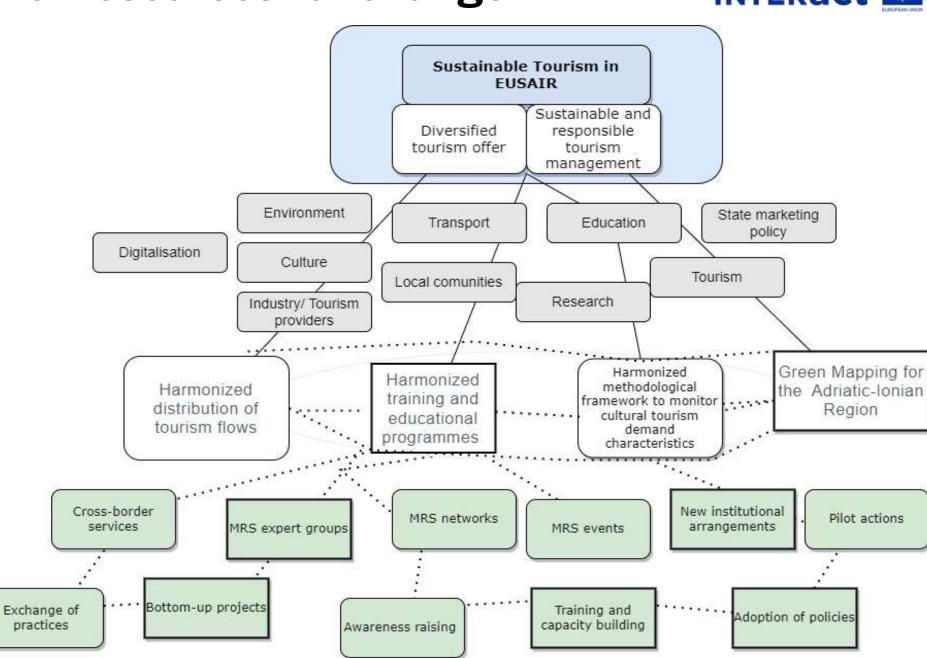

Intended change/ Mission

Changes implemented in policies, rules and procedures

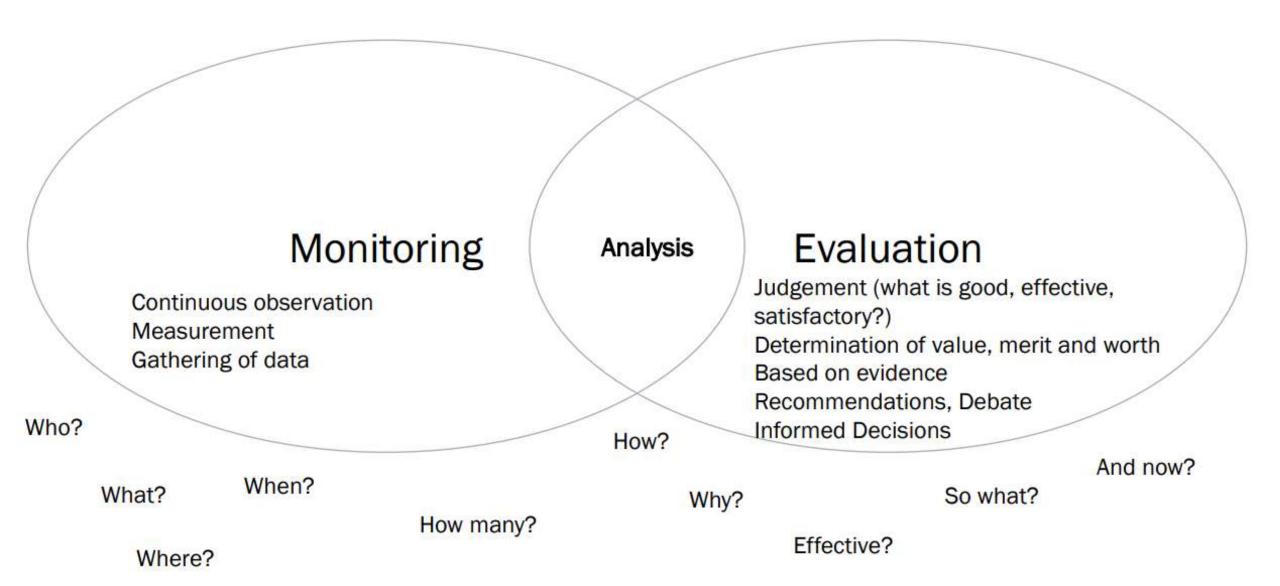

Expected outcomes

Implementation

Monitoring and Evaluation

Thematic MRS performance – possible indicators

	Indicators for MRS action at thematic level (ideally this will be measured for			
Davisanas	each impact pathway and then aggregated for each mission)			
Performance area	Activities	Outputs		
Engagement	Engaged country/regional representatives in the steering groups	Engaged actors in the overall coordination of the thematic area		
of stakeholders	Engaged actors at local, regional, civil society level in policy coordination activities relating to each mission/impact pathway	New engaged actors per year per impact pathway		
Alignment of Funding	EU Funds raised per impact pathway in EUR	Overall funds invested in an impact pathway in EUR		
	National public funding leveraged per impact pathway in EUR	Number of projects per impact pathway/thematic area mission		
	National private funding leveraged per impact pathway in EUR			
Implementatio n and Coordination Activities	No of policy-action processes, project/initiative portfolios per impact pathway No of multi-stakeholder dialogues held per impact pathway No. of other cooperation activities per impact pathway/mission (a monitoring of different types of activities would be necessary, but here they can be aggregated) No. of trainings/capacity development per impact pathway/mission	New tools and solutions per impact pathway New knowledge generated per impact pathway Newly created services or products per impact pathway New or changed regulation per impact pathway Newly created units, positions, interfaces per impact pathway New networks per impact pathway New cooperation agreements per impact pathway New platforms per impact pathway		

Valuable information in the context of evaluations on effectiveness of coordination/implementation processes and into evaluations of thematic contribution to change (per Thematic Area)

Activities

Outputs

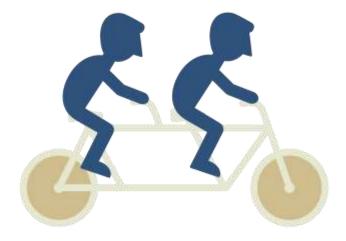

Enabling Factors

Contribution to Change

Impact stories

- Rather than just explaining what your thematic area or MRS does, an impact story uses a
 real narrative, featuring actual people and events, to make an emotional connection
 between your audience and the valuable work that you do.
- Useful tool when one cannot invest in complex monitoring and evaluation systems (cannot support expensive research).
- Helps to demonstrate impact of complex systems such as MRS.
- Indicators on their own do not tell the story.

How to show this impact – credibility is important

Activities

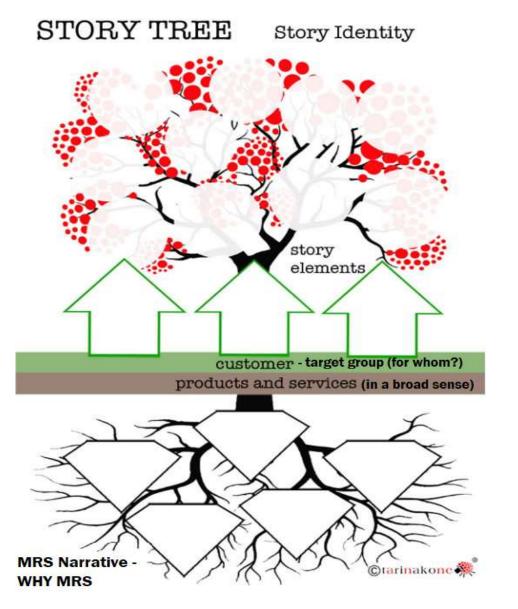

MRS Impact Story Contribution to change delivered by PA -Which enabling factors Added Value compared to What has been done? have been improved, national and sectoral policies Which processes are What has been the result impacted? or Interreg programmes: there, have been started, of the activity? -**Enabling Factors** Cross-sector coordination are on-going, being Outputs Capacities Linking different initiatives supported? -Networking/Collaboration (e.g., projects) together and Activities Culture to policy processes Knowledge - Working-level links with Third Countries Multi-Level coordination Long-term commitment

Contribution to Change (What was the impact?)

Outputs

Enabling Factors

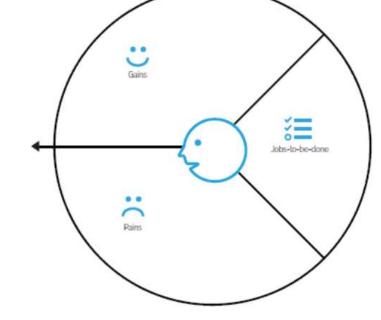

How do we tell others?

- How do we pick what to tell? Do you think that this impact would have occurred in any way if there was no engagement from MRS?
- Who will tell about the impact?

 Which elements are important for the one whom you tell about your achievements?

How would this work in the context of Pillar 4?

Cooperation works
