# On the path of hill forts-Maklavun

Srednja škola ZVANE ČRNJE ROVINJ Scuola media superiore "Zvane Črnja" Rovigno Od polovine brda kamen gospodari, njegujući guju u svojoj surovoj šutnji, iznad sunce poput grabljivice krstari držeći zemlju u nedoumici i smutnji.

Vlado Puljić

• This project was focused on two hill forts dating back to the Bronze Age located on the territory of the former Rovinj municipality. The two hill forts are Maklavun and Mušeg.

## Goals achieved:

- We have learned important facts about Maklavun-a significant cultural heritage site
- We have learned about the importance of the valorization and preservation of cultural heritage
- We have placed info boards at the site and marked the Maklavun-Mušeg path and our initiative contributed to the development of cultural tourism and cycling tourism in Istria.
- We have connected four different professions in the development of this project thus emphasizing the importance of team work
- We have established collaborations with scientifical institutions, tourist boards and the local community

The first step of our research was learning about Maklavun.

Archeologist Damir Matošević from the Rovinj Heritage Museum delivered a lecture on hill forts and tumuli (Bronze Age tombs)...

On 29 March 2017 he introduced us to the world of archeology.

★ We created a logo for our project and cleanup...

...that was printed on the promo T-shirts along with the logos of the schools and collaborators.

★ After working hard with our cooking teacher while preparing the bread dough that we baked in the oven, we enjoyed our well-deserved meal.

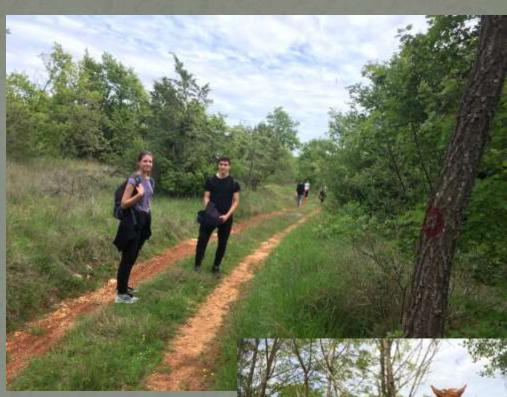

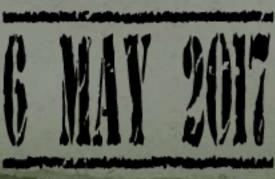

★ We marked the 8-km long Maklavun-Mušeg path .
